INDEX TO VOLUME 49

AMBERG, M. F., see WEIDMAN, P. D. 373
ARRIGO, D. J., see HILL, J. M. 19
ARRIGO, D. J., see HILL, J. M. 337
ATKINSON, C., see CRASTER, R. V. 311
BUCHWALD, V. T. and VIERA, F. Linearized evaporation from a soil of finite depth near a wetted region 49
CAO, J. Computer-extended perturbation solution for the large deflection of a circular plate. Part I: Uniform loading with clamped edge 163
CAVIGLIA, G. and MORRO, A. Inhomogeneous waves in transversely isotropic solids 451
CHANG, D. and POPPLEWELL, N. A non-uniform, axially loaded Euler–Bernoulli beam having complex ends 353
COOKER, M. J. Sudden changes in a potential flow with a free surface due to impact 581
CRASTER, R. V. and ATKINSON, C. On finite-length cracks and inclusions in poroelasticity 311
CRASTER, R. V. Wavefront expansions for pulse scattering by a surface inhomogeneity 657
DEVENISH, B., see FU, Y. 65
DROZDOV, A. Stability of integro-differential equations with periodic operator coefficients 235
EL-KAREH, A. W. and SECOMB, T. W. Stokes flow impinging on a spherical cap on a plane wall 179
EVANS, D. V., see FERNYHOUGH, M. 419
FERNYHOUGH, M. and EVANS, D. V. Comparison of a step approximation to an exact solution of acoustic scattering in a uniform-width pipe with non-uniform wall impedance 419
FU, Y. and DEVENISH, B. Effects of pre-stresses on the propagation of nonlinear surface waves in an incompressible elastic half-space 65
GOLDEN, J. M. and GRAHAM, G. A. C. The viscoelastic moving-contact problem with inertial effects included 107
GRAHAM, G. A. C., see GOLDEN, J. M. 107
GREGORY, R. D. Helmholtz's theorem when the domain is infinite and when the field has singular points 439
HILL, J. M. and ARRIGO, D. J. On axially symmetric deformations of perfectly elastic compressible materials 19

HILL, J. M. and ARRIGO, D. J. Small deformations superimposed upon the symmetrical expansion of a spherical shell 337
HILL, J. M. and WU, Y.-H. The punch problem for shear index granular materials 81
KELMANSON, M. A. and LONSDALE, B. Eddy genesis in the double-lid-driven cavity 635
KRASNOPOLSKAYA, T. S., MELESHKO, V. V., PETERS, G. W. M. and MEIJER, H. E. H. Steady Stokes flow in an annular cavity 593
LEWIS, P. A. A theory for the diffraction of SH waves by randomly rough surfaces in two dimensions 261
LONSDALE, B., see KELMANSON, M. A. 635
MEIJER, H. E. H., see KRASNOPOLSKAYA, T. S. 593
MELESHKO, V. V., see KRASNOPOLSKAYA, T. S. 593
MORRO, A., see CAVIGLIA, G. 451
MOVCHAN, N. V. and WILLIS, J. R. Critical load for a mode-1 crack reinforced by bridging fibres 545
PETERS, G. W. M., see KRASNOPOLSKAYA, T. S. 593
POPPLEWELL, N., see CHANG, D. 353
PUCCI, E. and SACCOMANDI, G. Some universal solutions for totally inextensible isotropic elastic materials 147
RANGER, K. B. Time-dependent decay of the motion of a sphere translating and rotating in a viscous liquid 621
RILEY, N., see WAKELIN, S. L. 287
ROBERTS, P. H., see WU, C. C. 501
SACCOMANDI, G., see PUCCI, E. 147
SCHIAVONE, P. On the third boundary-value problem in plane strain 137
SECOMB, T. W., see EL-KAREH, A. W. 179
TANUMA, K. Surface-impedance tensors of transversely isotropic elastic materials 29
TING, T. C. T. Existence of an extraordinary degenerate matrix **N** for anisotropic elastic materials 405
TING, T. C. T. Green's functions for an anisotropic elliptic inclusion under generalized plane strain deformations 1
URSELL, F. Infinite systems of equations. The effect of truncation 217
VIERA, F., see BUCHWALD, V. T. 49
VIGDERGAUZ, S. Rhombic lattice of equi-stress inclusions in an elastic plate 565
WAKELIN, S. L. and RILEY, N. Vortex ring interactions II. Inviscid models 287
WATSON, E. J. Slow viscous flow past two rotating cylinders 195
WEIDMAN, P. D. and AMBERG, M. F. Similarity solutions for steady laminar convection along heated plates with variable oblique suction: Newtonian and Darcian fluid flow 373

WILLIS, J. R., see MOVCHAN, N. V. 545
WU, C. C. and ROBERTS, P. H. Structure and stability of a spherical shock wave in a van der Waals gas 501
WU, Y.-H., see HILL, J. M. 81
YUE, Z. Q. On elastostatics of multilayered solids subjected to general surface traction 471
